Crosrol

Sliver Delivery Tube (Coiler)

A range of large bore Coiler Delivery tubes together with replacement lower Aluminum disc's suitable for all models of previously supplied Crosrol coilers.

Originally designed for the more voluminous synthetic fibers, the 60mm coiler tube has also proved very effective when processing cottons at high delivery speeds.

The larger diameter (60mm) coiler tube (previously 38mm) ensures a more efficient piecing procedure, which reduces piecing waste and sliver breaks, leading to increased efficiency and production.

Replacement Large bore Sliver delivery tubes are available for 24" (610mm), 36" (910mm) & 40" (1020mm) diameters of Crosrol coiler,

Parts included in the Change Kit: -

- Lower Aluminum Rotary Table Extension Disc.
- Sliver Delivery tube (60mm Diameter) together with associated support plate.
- Full instructions on how to assemble the new change kit to your old Coiler.
